

Viridiflora Tulips

(Green Tulips)

Many visitors to our Nurseries Exhibits were delighted about the delicate elegance of these Tulips and therefore the 'green' viridiflora Tulips have been separately listed. They are green shaded and considered to be the most delicate of all Tulips, ever created. The green structure of the flower petals enable these varieties to stand all weather conditions extremely well.

Fall planting for 1961

We take pleasure in presenting the following list of bulbs which we have to offer for 1961 Fall planting. Each year we include a few of the newer varieties of recent introduction, as well as the older tried varieties. These bulbs are produced in Holland and shipped to us directly from our grower. We solicit your inquiries and will be glad to be of any assistance in helping you to get the best results.

Cottage Tulips

(May-flowering)

Cottage Tulips are so named because they have mostly been found in old Cottage Gardens of Great Britain and France, where they have been growing for a great number of years. They are distinct in habit, embrace many beautiful colours and are excellent for borders, where they should be freely planted in large clumps or masses. They may also be naturalized in grass, wild Gardens, etc. and present a gorgeous display during the month of May.

Parrot Tulips

(May-flowering)

These artistically shaped flowers with their heavily lacinated petals have no rivals for exquisite effect. The gorgeous flowers are large and strikingly beautiful, they are very effective and picturesque in the garden for their rich brilliancy; fine for table decoration and bouquets in vases. A mixed bunch of Parrot Tulips creates a fascinating and artistic effect, they last well in water.

Lily-Flowering Tulips

(May-flowering)

Unsurpassed for elegance and charm, the varieties of this section are most graceful and highly distinct. Beautifully reflexed and pointed petals form flowers of fascinating beauty, which are borne on tall wiry stems, rendering them extremely useful for cutting and table decoration. Lily-flowering Tulips are a handsome contribution to the garden and give their refined display in May. Plant in groups of twelve in order to obtain a more beautiful effect.

Muscari

(Grape, Starch and Feathered Hyacinths)

We strongly recommend this lovely family of sweet scented spring flowers, for naturalizing or the border, where they give a splendid account of themselves. They are also very valuable for forcing and pot-culture and require no special treatment or soil. Leave undisturbed and they multiply very rapidly.

Fosteriana Tulips

Is it not somewhat remarkable to think that after more than three centuries of careful cultivation and hybridising, Western Europe has not been able to produce anything to match in size and brilliancy of colour with these Bokhara Tulips growing wild on the mountain slopes of the Asiatic desert. We may, however, predict that by the influence of Tulipa Fosteriana in course of time an extremely large new strain of Tulips will be produced that will stand out in size and colour such as Tulipa Fosteriana Red Emperor (Mad. Lefebvre), Holland's Glory etc. Plant Tulips Fosteriana 4 inches deep.

Tulipa Clusiana
20 cts each; \$ 1.75 per doz.

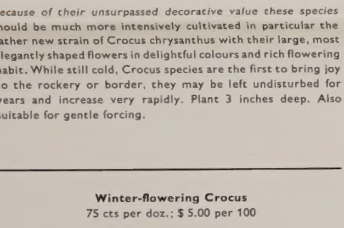

Kaufmanniana The First
30 cts each; \$ 3.00 per doz.

Kaufmanniana Tulips

One of the most remarkable groups of Hybrids of recent introduction form the beautiful Tulipa Kaufmanniana. They flower far ahead of other Tulips on short stems and establish themselves easily, coming up freely year after year without any care.

Most of them have mottled, striped, or spotted foliage like Greigii, which is a beautiful and interesting characteristic on its own. We very strongly recommend them for the rock garden, border and other places where they can be left undisturbed.

Winter-Flowering Crocus Species

Because of their unsurpassed decorative value these species should be much more intensively cultivated in particular the rather new strain of Crocus chrysanthus with their large, most elegantly shaped flowers in delightful colours and rich flowering habit. While still cold, Crocus species are the first to bring joy to the rockery or border, they may be left undisturbed for years and increase very rapidly. Plant 3 inches deep. Also suitable for gentle forcing.

Winter-flowering Crocus

Winter-flowering Crocus chrysanthus Zwanenburg Bronze

Large Dutch Crocus

When planted two or three inches apart in squares, the many flowers each bulb produces will thickly cover the whole plot. Planted in lawns and grass they are extremely effective. They are also very fine for forcing but should be brought on slowly in an airy situation. Crocuses should not be planted too deeply and can be left undisturbed for years.

Chionodoxa (Glory of the Snow)

The Chionodoxa is one of the most beautiful spring flowers and when established its sheets of blue in very early spring are a great attraction in the garden. They are quite hardy and most valuable for naturalizing. Once planted they come up year after year and the flower-spikes increase in size and beauty. They may also be brought into bloom in a cold frame or cool greenhouse. March-April flowering.

For Indoor Pot Culture

Anemone St. Brigid (Semi Double)
75 cts per doz.; \$ 5.00 per 100

ANEMONES (Windflowers)

They excel in richness, being of all shades and colours and can be had in bloom from early Spring till July if planted in succession from October to April. They flourish in any garden soil and should be planted four to six inches apart and one to two inches deep. The roots should always be kept in a perfectly dry place before planting as they are extremely sensitive to dampness.

Ixia mixed
75 cts per doz.; \$ 5.00 per 100

IXIA (African Corn Lily)

Ixias are exceedingly free flowering and are very graceful, bearing on wiry stems long racemes of blooms and they propagate with amazing rapidity. They are invaluable for cutting, easily grown in pots and produce a combination of colours rarely seen in any other family of plants. Plant 3 inches deep and cover well against frost in winter. Flowering in June.

Amaryllis Winter Joy
\$ 4.00 each

AMARYLLIS WINTER JOY (Hybrid)

One of the most outstanding and beautiful scarlet-red Amaryllis hybrids ever raised, a seedling from Amaryllis Hippeastrum x A. equestris, producing generally two strong stems on each bulb with four brilliant red flowers of perfect form on each stem and wonderful green leaves at the same time. An ideal variety for home growing and can be had in flower from Christmas onwards by gentle forcing.

Sparaxis

Lovely bulbous plants of the same habit as Ixias. The flowers are even larger in size and produce a combination of colours rarely seen in any other race of bulbs or plants. They deserve to be cultivated more extensively. Very useful for pots, rock; and alpine garden etc.

Sparaxis mixed
75 cts per doz.; \$ 5.00 per 100

Scilla (Squill) Early flowering

A very charming plant for early Spring flowering, either planted in masses or for edging. They are of dwarf and compact habit, excellent for bedding in pots, bowls, etc. and form a pleasing effect among indoor plants. Recommended for planting in generous quantities.

Scilla Siberica
\$ 1.00 per doz.; \$ 7.00 per 100

Iris Reticulata (The fragrant Iris)

A most lovely and useful Iris, producing out of doors in February-March charming deep violet-blue flowers with conspicuous golden-yellow blotch on lower petals, invaluable for naturalizing, also exceedingly useful for pot-work, flowers scent like Violets, strongly recommended and quite hardy.

Iris reticulata
75 cts per doz.; \$ 5.00 per 100

Dutch Iris mixed
\$ 1.00 per doz.; \$ 7.00 per 100

Dutch Iris

It would be difficult to name any other hardy bulbs that repay the trouble of cultivation better than the Iris. Their blossoms compete in richness and variety of colours with the choicest and most beautiful of Orchids. As cut-flowers they are particularly useful as the blooms last well, if cut when the buds are opening.

Peonies

Edulis Superba (Dble) bright rose pink, crown type. Early \$ 1.00 each Felix Crousse (Dble) brilliant ruby red, bomb type. Mid \$ 1.00 each Festiva Maxima (Dble) pure white flecked carmine. Hyacinths for Bowls or Bedding

These are specially selected bulbs, hand-picked and perfectly healthy, which we can recommend with every confidence for forcing purposes.

If bulbs are forced in quantities in boxes or large pots, they may be transferred into Bowls, Jardinets etc. when coming into bloom; this may be done without the least check or injury to the blooms.
